Cyber Angel's Interview Cheat Card

30-Second Elevator Pitch

Hi, I'm a cybersecurity professional with over 10 years of IT and privileged access management experience. I've worked directly with Delinea Secret Server and Privilege Manager to secure enterprise environments, streamline privileged account workflows, and improve compliance with standards like PCI DSS. I'm highly adaptable, customer-focused, and skilled at balancing strong security controls with great user experiences. I'm excited to continue growing my impact by helping organizations strengthen their security posture while enabling their teams to move faster and smarter.

Tell Me About Yourself

I'm a cybersecurity professional with over 10 years of IT experience, specializing in Identity and Access Management and Privileged Access Security. Most recently, I've worked hands-on with Delinea Secret Server and Privilege Manager to design secure access controls, manage privileged accounts, and support enterprise-grade 24/7 environments. I take pride in balancing technical excellence with a strong customer-focus ? helping teams adopt secure practices without adding friction to their work. I'm highly adaptable, solution-driven, and experienced in aligning security initiatives to compliance standards like PCI DSS. I'm excited to bring my operational expertise, problem-solving mindset, and commitment to secure, scalable outcomes to a role like this, where I can help drive both security and user success.

Quick STAR Story Keywords

- Secret Server Deployment: Vaulted 300+ critical server credentials, auto-rotation, audit readiness

- Privilege Manager Elevation: Removed local admin rights, dynamic elevation for approved apps, endpoint security strengthened

- 24/7 Operations: Built monitoring and escalation workflows for customer-facing environments, uptime improvement

- Emergency Access: Emergency workflow creation, time-limited access, detailed audit trails

- Compliance Alignment: Mapped access controls to PCI DSS 7.x standards, passed SOX audits

Key Tech Skills to Mention

- Delinea Secret Server (Privileged Credential Vaulting)

- Delinea Privilege Manager (Endpoint Privilege Management)

- IAM Fundamentals (Authentication, Authorization, RBAC)

- PCI DSS Compliance Standards (Access Controls, Logging)

- Microsoft Entra ID / Azure Active Directory (Conditional Access Policies)

- MFA Deployment (YubiKey, Okta Integration)

- Python Basics (for Security Automation Projects)

- SIEM Monitoring (Azure Sentinel)

- Incident Response & Documentation (Runbooks, Knowledge Base Articles)

Quick Final Tip

Smile lightly, speak confidently, and connect your experience to their needs!

"I help organizations secure their most critical access without slowing down their people."
